(54) Title: BOOSTER SEAT

(57) Abstract: A booster seat having a base 10 with foldable legs 20 to raise and lower the base. A seat assembly 12 is provided on the base having a seating surface 50 and arms 52. A backrest 14 is pivotally connected to the seat assembly 12 and moves between an operative erect position and a stored collapsed position wherein it lies substantially parallel to and closely adjacent the seating surface 50. A tray 16 is selectively mountable on the seat assembly 12 for use by a child seated in the booster and a stored position on the bottom of the base 10. A retractable strap assembly is mounted in the base having one pair of straps 168 and 169 for wrapping around the seat and a second pair of straps 164 and 165 for wrapping around the back of a chair on which the booster is supported.
